BLUE INLINE GASKETED FILTER

HaleyMfg.com

SPECIFICATIONS

The pressure screen filter body is cylindrical with the stainless steel screen filtering element concentric inside it.

Blue wedge gaskets seal the screen to the filter body on each end.

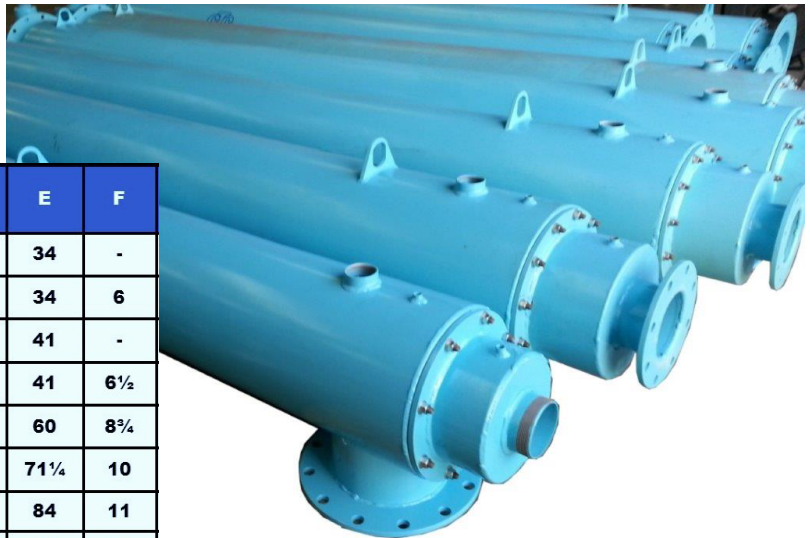

Heavy steel body construction, sand blasted and double epoxy coated.

Filter inlet and outlet are flanged. A bolt on head allows easy removal of the screen element.

Two ¼ NPT pressure gauge ports are provided to monitor screen condition.

- ◆ Sandblasted and dual epoxy coated with marine grade products.
- ◆ Pressure gauge port and air vent port on each filter.
- ◆ Screen gasket sealed to the body.
- ◆ Filtering up to 75 microns.
