# R.A.B.

## FOR PERFORATED SCREEN FILTERS

UPGRADE ANY *B.I.G.*, *T.I.G.*, OR *G.N.G.* SERIES FILTER TO AUTOMATICALLY SELF CLEAN!

### R.A.B. (Rotating Automatic Brush)

Automatic self-cleaning for perforated screen elements

Pressure differential or timed cycle initiation

Reduce labor costs in system maintenance with an R.A.B!

# ROTATING AUTOMATIC BRUSH

[HaleyMfg.com](http://HaleyMfg.com)

## HOW IT WORKS

Upon signal from a differential pressure switch, an automatic cleaning is to initiate. The brushes inside the screen element sweep the screen surface breaking all the debris loose. At the same time a motor operated valve opens to exhaust all debris from inside the screen element. The system then shuts itself off until the next cleaning is needed.

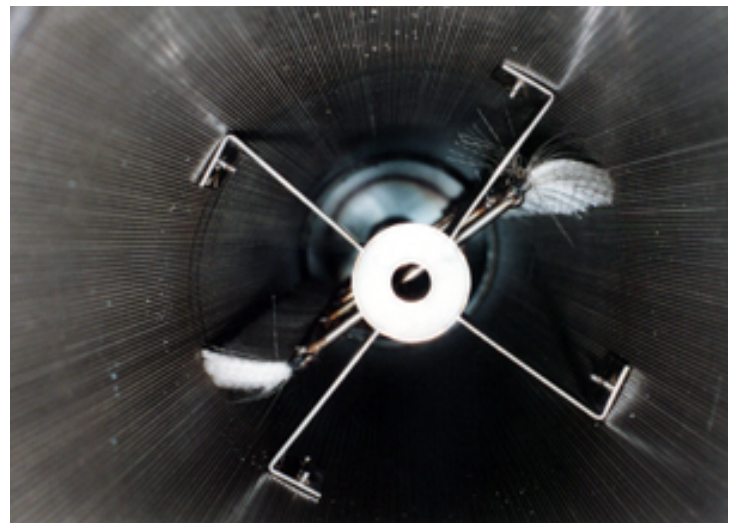

Cleaning is on a pressure differential or time interval basis. The control system will be NEMA 4 rated, and will requires 120v AC power.

IS FULLY CONTAINED IN FILTER  
HEAD CAP AND SCREEN ELEMENT.

COMES FULLY ASSEMBLED

Filter Series	Size	Assembly #
B.I.G	3 in.	BA-510
	4 in.	BA-511
	6 in.	CA-512
	8 in.	CA-513
	10 SMALL	DA-514
	10 MED	DA-515
	10 LARGE	DA-516
G.N.G	1000 GPM	BA-517
	1200 GPM	BA-518
	1500 GPM	BA-519
T.I.G	3 in.	BA-589
	4 in.	BA-599
	6 in.	BA-520
